

LED STRIP 12V

LED STRIP

The 12V LED strips can be bent in any small radius. They can be safely used anywhere, even in a nursery room due to their low operating voltage. Available in warm, neutral and cold white color temperatures or RGB version with 5 different wattages.

LED STRIP 12V

DIY SETS

The ready to use versions of 12V LED strips do not require other accessories. The neutral white and colorful (RGB) versions can be installed easily in any household or store. A modern, digital, pulse-modulated tri-color RGB controller is used to operate the LED strip. The system can be used for continuous operation or temporarily to color the environment and to save energy.

cabinet light, cabinet light with sensor

Special 12V LED strips with motion-sensor and aluminium based cabinet lights. The motion-sensor strip can be mounted under the bed or in places where this kind of light is needed. In case of the cabinet lights, we can use the touch or proximity sensor to adjust the required brightness for a kitchen counter or any other furniture. Available in 50cm and 60cm versions, single or double blister packages and in two wattages.
